A

α-cells (yest) 62
A fibres 432
a-cells (yeast) 62
Acetylcholine (ACh)
  and ATP 420
  in cortex 217
  regulation of synthesis 486
  in striatum 228
Acetylcholine (ACh) receptors
  induction by agrin 469
  muscarinic 228, 533
  nicotinic 425
ACh, see acetylcholine
Acid
  and capsaicin-sensitive neurones 509
Acquired immune deficiency syndrome (AIDS) 49
Acquired thermotolerance 136
Actin filaments 21, 370
Activin 234
Adaptins 349
Adaptive behaviour
  neuronal architectures for 413
Adenosine 203, 254, 421
Adenosine receptors 254
Adenylate cyclases
  as coincidence detectors 37, 366 (L)
  in olfaction 481
  in slime mould chemotaxis 67
Adrenal chromaffin cells 427
Adrenergic neurones
  and ATP 420
African sleeping sickness 325
Ageing (neuronal) 13, 486
Agnosia, visual object 293
Agonists
  for benzodiazepine receptors 218
  for G-protein-coupled receptors 531
Agrin 469
Agrin receptor 469
AIDS, see acquired immune deficiency syndrome
Alamethicin 441
Allodynia 432
ALS, see amyotrophic lateral sclerosis
Alzheimer's disease
  and apolipoprotein E 527
  and free radicals 194 (L)
  and neuronal health 51 (L)
  neurotransmitter replacement therapy for 149 (L)
  and neurotrophic factors 187, 489
  and synuclein proteins 404
Amino acids, critical
  in CaM kinase II activity 411
  and photopigment tuning 35
γ-Aminobutyric acid, see GABA
AMPA (α-amino-3-hydroxy-5-methyl-4-isoxalone propionic acid) 16, 407
AMPA receptors
  in amygdala 210
  interactions with neurokinin receptors 435
  and LTP 497
  and neuronal death 360
  subunits in neocortex 536
Amphibians

of midline–intralaminar thalamic pathways 53
representation in visual imagery 287, 291, 292
Toxins, see neurotoxins
Transcription factors
and axon–Schwann cell interactions 399
during cortical development 444
heat-shock 136
in neural induction 241
in olfaction 482
and regulation of transcription 315
Transformation (of 3D brain images) 459
Transforming growth factor α (TGF-α) 357
Transforming growth factor β (TGF-β) 48, 234, 357
Transgenic mice
to study learning 71
Transplantation studies 233, 476
Trans-synaptic modulation
of cortical ACh 217
Trichromacy 30
Trigeminal ganglion neurones
ion channels in 155
Trk receptors, see tyrosine kinase receptors
Trypanosoma brucei 325
Trypanosome-derived lymphocyte triggering factor 326
Tubulin 19
Tumour necrosis factor 326
Tyrosine kinase receptors (Trk) 182, 487, 490

U
UK neuroscience
and technology transfer 333
Utrophin 470

V
VAMP, see vesicle-associated membrane protein
Van der Loos, Hendrik (1929–1993) 93 (O)
Vasoactive intestinal peptide (VIP)
effects of axotomy on 24
and ion-channel modulation 533
and messenger plasticity 339 (L)
'superfluous' expression of 316
Vasodilation
and pH 511
Vasopressin 340
Venom
neurotoxins derived from 151
Ventricular zone
and cortical specification 1
Ventrobasal complex 245
Verbal short-term memory 111
Vertebrate nervous system
architectures for adaptive behaviour in 413
evolution of 227 (L)
'superfluous' neuropeptides in 316
Vesicle dynamics 344, 348, 368, 426
Vesicle-associated membrane protein (VAMP) (synaptobrevin) 345, 368, 429
Vestibulo–acoustic neurones 196
VIP, see vasoactive intestinal peptide
Vision
in birds 549 (BR)
colour (primates) 30
and dendritic processing 259
disruption of 126
pathways in 305
and perception 175, 281, 287, 292
Visual areas
effect of lesions on 126
pathways to 305
and visual imagery 281, 287, 290, 292, 295, 514 (L), 515 (L)
Visual cortex
effects of damage to 126
excitatory amino acid receptors in 541
organization of 43 (BR)
pathways to 305
and visual imagery 282, 287, 290, 292, 294
Visual imagery
anatomical basis of 281
neuroimaging studies of 292
occipital activation during 290
and retinotopical areas 294, 514 (L), 515 (L)
topographical representation of 287
Visual search
and attention 76
Voltage clamp 164
Voltage sensors (Na^+ channel) 59
Voltage-gated channels
and dendritic integration 165, 166
see also calcium (Ca^{2+}), potassium (K^+) and sodium (Na^+) channels
Voxels (brain imaging) 459

W
Walking
control of (*Drosophila*) 485
Whitteridge, David (1912–1994) 446 (O)
Windup (activity-dependent hyperexcitability) 433
Wnt1 235

X
X chromosome
and photopigments 30
Xenopus oocytes
ion channels in 157

Y
Yeast
chemosensory transduction in 62

Back Issues of Elsevier Trends Journals

Back issues from 1993 and 1994 are available to our customers at the following rates. Please state which issue(s) and quantity you require, including the volume and number (or year and month).

Issues(s): _____

_____

_____

Please tick how many copies you would like below. Back issues are available in bulk at discounted rates – institutions/libraries must pay institutional rates.

Individual Rates

- ❑ Single copy £16.00/$25.00 each
- ❑ Five copies £68.00/$106.00 (includes 15% discount)
- ❑ Ten copies £120.00/$187.00 (includes 25% discount)

Institutional Rates

- ❑ Single copy £33.00/$52.00 each
- ❑ Five copies £140.00/$218.00 (includes 15% discount)
- ❑ Ten copies £248.00/$387.00 (includes 25% discount)

*Hardbound compendia of previous volumes are available to institutional subscribers. Please ask for further details.

PAYMENT METHOD:

- ❑ Personal cheque, Eurocheque, or money order made payable to **Elsevier**
- ❑ Credit card
  - ❑ Visa ❑ Mastercard ❑ American Express
